

## Category Theory Summer Conferences

The following is intended to be a list of (mostly week-long) international conferences organized by, and attended mainly or exclusively by, category-theorists during the (northern) summer months (which I have interpreted broadly as June to September, inclusive). Dates quoted are arrival and departure dates: in most cases there were no lectures on the arrival date, and in some there were none on the departure date. Unless otherwise indicated, the official topic of the meeting was simply ‘Category Theory’, or something equivalent; the meetings with other subjects are included because they were attended by a large proportion of ‘the usual suspects’. For meetings organized under the aegis of a body not solely devoted to category theory (MFI Oberwolfach, the London Mathematical Society, MSRI etc.) the meeting venue is shown in square brackets. The list begins with the 1965 La Jolla meeting, generally regarded as the first international meeting in the subject, but information from early years is still incomplete.
